

Software Processes and Quality, Fall 2012

Exercise 3.

Study the characteristics of open source software development by reading, for instance, the articles given below.

- (a) To what extent do the principles of open source development correspond to Agile Manifesto and the agile principles?
- (b) Describe the typical process of open source software development.

For instance, you may use the following articles as references:

C. Gacek, B. Arief: The Many Meanings of Open Source. *IEEE Software* 21, 1, 2004, 34-40.

M. Aberdour: Achieving Quality in Open Source Software. *IEEE Software* 24, 1, 2007, 58-64.
