Bottecchia

SIDI

MONFRINI

DESIGN BY DOMENICO MEZIOLO

1989

In 1924, Ottavio Bottecchia was the toast of Italy. The first Italian champion of the Tour de France, his unexpected triumph sparked a national celebration.

Bottecchia won again the following year and his fame grew beyond Italy's borders. Word of the racer who trained with the added resistance of a sack of stones spread across Europe.

Bottecchia's vast celebrity transcended cycling. Soon, foreign riders chafed with resentment.

Two years later, Bottecchia failed to return from a training ride in the Alps before the Tour de France. His death remains a mystery with no shortage of suspects nor theories to explain it.

To this day, Italians invoke his memory whenever a conspiracy taints the outcome of a sporting event.

Some say Ottavio's spirit lives on in every bicycle that bears his name.
