RTD-Log
17. meeting 13.3.01 12:15 - 14:00 in C475
Minutes

Present: Matti Johansson, Marko Moisio,
Minna Vasankari, Dan Patrick Doepel,
instructor Mika Karlstedt,
12:45→ customer Tiina Niklander
Absent: Juha Saarelainen

Topics:

- The number of written log records and image records should be kept in a global variable. This information helps deciding when the image or index should be written.
- SM_TCP_ERROR was agreed to be fatal.
- Tiina came and we discussed the recovery mechanism and the global status problem. A new interface is needed for maintaining the status variable. Both the Log system and FTRS of the existing system need to update the variable.
- Minna writes the corrections to the interface section, Marko updates the recovery section and Matti writes something about the recovery logic, maybe a whole new section.
- The document should be quite ready next Tuesday. Tiina wants to read the finished document.

The next meeting is on Friday 16.3. at 12:15.
