Topics:

- Due to the fact that the secretary for this week was chosen at the end of the meeting, there's not much written down.
- Marko will be the secretary for the next two weeks (or just one?)
- Tiina gave us some feedback about the Design document version 2. There was only one technical detail (about the use of semaphores) to clear out. Otherwise the document looked good, and it is accepted.
- There are still some spelling errors and such in the Desing document. Everyone should read their part through and make some corrections.
- CS Department carnival is on friday the 6th. We should create a few posters and maybe some other material about our work to display. We'll talk more about these on the next meeting. Everyone should take part on the carnival, and spend a few hours at our "stand".

The next meeting is on Friday 30.3. at 12:15.
