

# Exercise 1

Peer-to-Peer Networks, Spring 2008

## Guidelines

- Group work, groups of up to 3 people allowed
- Due date: 25.4. at 12:00
- Exercise is worth 6 points
- What to return: Return by email before deadline
- Don't forget to write all the names and student numbers on the answer!

## Question 1

Consider the CAN-based multicast system from the lecture slides. What kind of security problems does the system have and what kind of an effect would they have on the system performance? How could you try to solve the problems?
